

Extern Methods

This document contains every detail about the functionality, implementation and use cases of every function defined in the extern methods by ThanOS.

cr_cat

```
#include "extern_methods.h"
int cr_cat(char *path);
```

Description

Prints the contents of `path` to the `stdout`.

Return Value and Error Handling

If `path` is not an existing file, it logs a message to `stderr` and returns `0`. Otherwise, it returns `1`.

snap

```
#include "extern_methods.h"
void snap();
```

Description

Recursively removes half the files of every folder.

Return Value and Error Handling

No error handling. No return values. No return. Just destruction and dust.
